GEM050	Water and Energy Resources	30	Compulsory	October 2023	October	April

*all modules run once per year

**except for April 2023

Sessions and modules

There are two study sessions in a year, each lasting 22 weeks, and including an assessment submission point. Sessions begin in October and April, and these starting months are given above in the Session and Resit session columns to represent the session span.

Modules will run according to the table above (subject to minimum student registrations and availability). In exceptional circumstances, we may cancel all registrations for a module if an insufficient number of students have registered.

Resit opportunity

Where a module is failed, students will have the opportunity to resit only the failed assessment, as opposed to repeating the module in full. Students who are eligible for a resit opportunity will be prompted when registration opens for the resit. Please note that registration for the resit will take place after the session has begun for the modules that run in full. The resit must be taken in the session immediately following that in which the module was failed. If the opportunity to resit is not taken then the module will need to be repeated in full when it runs again. Visit: **Programme Regulations** for full details. The specific assessment dates will be provided after registration. The resit and module fees (applicable when a module is repeated) can be found in the **fee schedule**.
